Skills

- **Cloud Platform:** AWS
- **Linux Administration:** Linux (RHEL)
- **Configuration Management:** Ansible
- **Containerization:** Docker
- **Programming:** Python
- **Version Control:** Git

Projects

Enterprise Linux Infrastructure Automation

July 2026

Linux, Ansible, Git

- Designed and implemented an automated Linux infrastructure management solution using Ansible.
- Configured Linux servers, deployed services, managed users, and automated administration tasks.
- Improved infrastructure consistency across multiple environments using reusable playbooks and roles.
- Reduced manual configuration effort and improved deployment efficiency.

Experience

Cloud and DevOps Intern

May 2026 – December 2026

IPSR Solutions Ltd

- Gained hands-on exposure to Linux administration, cloud computing, infrastructure automation and version control.
- Worked with Ansible, Git and modern DevOps practices for deployment and system management.
- Improved operational efficiency through automation and infrastructure management.

Achievements

- Automated Linux server management using Ansible playbooks and roles.
- Participated in Hackathons and Podcasts.

Education

B.Tech Artificial Intelligence and Data Science

2022 – 2026

Dhanalakshmi Srinivasan College of Engineering, Coimbatore

CGPA: 8.3
